CODE

ref#	addr	data type
76	0xfa837	c.t.p.e.Product
77		
78		

Consider...

```

ClassC cc = new ClassC();
cc.f1(); // invokes f1() from ClassA
cc.f4(); // invokes f4() from ClassC
  
```

```

ClassD cd = new ClassD();
cd.f1(); // invokes f1 coming from ClassC
String s = cd.f4();
// available from ClassB and ClassC with
different signature. Which one you think should
be invoked???
  
```
